

Business Analysis Workshop

Business Analysis Training : learn how to analyze the business requirements and build the right solution.

Business analysis training: in a modern, fast-paced business environment, analysts must possess skills to effectively communicate business needs, rules, structure and workflow to all relevant stakeholders.

A working knowledge of modeling is the key to ensuring that this business challenge is met.

This business analysis training course is structured around a series of activities in which you gain practical modeling experience. In the context of a real world case study, you apply best practices in modeling to help you fulfill your crucial role as a business analyst.

Détails

• Code : MM-BAW

• Durée : 2 jours (14 heures)

Objectifs

- Clarifying the role of the business analyst
- Analyzing and prioritizing competing business needs
- Creating dynamic business models using workflow diagrams
- Writing SMART business objectives
- Quantifying business case benefits and costs

Public

- Business Analysts

Pré-requis

Programme

Introduction

- Why do you need business models?
- Modeling skills

Defining the Scope of Modeling

- What is a business model?
- Separating textual and diagrammatic elements
- Contrasting scope with level of detail

Crafting a process to develop a business model

- Applying the steps: elicit, analyze, document, validate
- Iterating the steps
- Facilitating requirements workshops
- Mapping models to deliverables

Charting the multidimensional aspects of a business model

- Applying the five Ws approach: who, what, where, when, why and how
- Selecting the right modeling approach
- Employing CASE tools and simulation

Mapping the Business Landscape

- Analyzing the enterprise
- Exploring the enterprise architecture
- Decomposing the architecture into its components
- Usage of a Component Business Model

Applying business rules

- Documenting the constraints: operative and structural
- Representing rules with decision tables
- Scoping Business Functions

Initiating the process with functional decomposition

- Determining the functional hierarchies
- Distinguishing between functions and processes

Drawing UML use case diagrams

- Defining scope and boundary
- Identifying the actors
- Refining the use cases

Documenting business use cases

- Selecting the appropriate level of detail
- Specifying preconditions and post-conditions
- Modeling Business Processes

Applying process modeling techniques

- Workflows
- Events
- Activities
- Decisions
- Sequencing
- Messaging
- Roles

Leveraging Business Process Modeling Notation (BPMN)

- Benefits from a standardized approach
- Sequencing and classifying activities
- Categorizing events
- Emulating a Business Process

Refining business process diagrams

- Choosing the right gateway: decisions, forks and joins
- Mapping the processes to swim lanes and pools
- Supplementing the model with artifacts

Analyzing the Enterprise Structure

- Establishing the business domain
- Documenting the workers and organization units
- Modeling systems, documents, information and tools

Structuring the enterprise with UML class diagrams

- Determining object attributes
- Generalizing and specializing relationships
- Constructing associations between the classes
- Packaging for domains and functional units

Finalizing the Business Model

- Achieving complete coverage with matrices
- Prioritizing features
- Cross-referencing requirements
- Correlating behavior with roles

Contextualizing the model with perspectives

- Documenting business interfaces
- Mapping from means into ends
- Capturing time parameters

Communicating the Model to Key Stakeholders

- Knowing your audience
- Selecting the right level of detail
- Choosing the right model for your audience
- Converting business models into user requirements
- Delivering your models

Modalités

- **Type d'action** :Acquisition des connaissances
- **Moyens de la formation** :Formation présentielle - 1 poste par stagiaire - 1 vidéo projecteur - Support de cours fourni à chaque stagiaire
- **Modalités pédagogiques** :Exposés - Cas pratiques - Synthèse
- **Validation** :Exercices de validation - Attestation de stages
