

Testing web services using SoapUI PRO

Testing Web Services with SoapUI PRO

SoapUI Pro is a test automation software tool to create, manage and execute automated tests or perform load tests for Web services or SOA.

SoapUI Pro works in all environments and platforms for test automation. You can use it for Apis (application programming interfaces) created with .net, j2e, Perl, PHP, etc... The only requirement on your Apis is that they have a defined service description (WSDL, WADL), which is valid in SOAP / HTTP.

SoapUI Pro does not require developer skills for its implementation and deployment: whether you want to create a software test plan or a test suite, add functional test cases, or modify them, it is surprisingly easy with SoapUI Pro.

Détails

- **Code** : SaopUI-PRO
- **Durée** : 2 jours (14 heures)

Public

- Architectes
- Chefs de projets
- Développeurs

Pré-requis

Objectifs

Programme

Modalités

- **Type d'action** :Acquisition des connaissances
- **Moyens de la formation** :Formation présentielle – 1 poste par stagiaire – 1 vidéo projecteur – Support de cours fourni à chaque stagiaire
- **Modalités pédagogiques** :Exposés – Cas pratiques – Synthèse
- **Validation** :Exercices de validation – Attestation de stages
